

## HOW TO PLAY WITH RESIN!

- Think of your resin as glue. Use it to make everything stay in place. **Note:** When using as a base holder, make sure to expose resin to direct sunlight. A 365nm UV light (not supplied) may be used.
- To make it easier to pour, try keeping the bottle upside down, with the CAP ON, in a cup or bowl for at least 1 minute.
- When poured, resin will take a few seconds to drip or spread.
- Don't overfill your potion bottle. Make sure you have enough room for your materials and to close.
- If large bubbles appear when pouring, use the tip of the tweezers to pop them. **Note:** The more you mix/stir the resin, the more bubbles that will appear.
- While resin is still wet, using tweezers, take the time to carefully place all your items before setting.
- Only check if resin has hardened with the tweezers provided.

### 1 MAKE IT

- Mix your ingredients by following the step-by-step recipe on the tray.

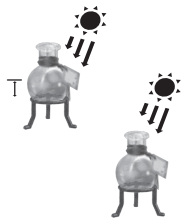

### 2 SET IT (FULL BOTTLE)

- Slowly pour the resin into the potion bottle. **Note:** Using the provided utensil (tweezer, spoon etc.), release any air bubbles trapped underneath.
- Some items may be difficult to fit through the funnel and potion bottle. Using the provided utensil you can push ingredients into the bottle.
- Once filled, set it in direct sunlight or UV light (365nm) on a tray for at least 5 minutes or until hard. **Note:** Do not fill the bottle to the very top as room is needed to close with the stopper.
- Let the potion cool down before closing with the stopper.

### 3 SET IT (LAYERS)

- Slowly pour the resin half way up the bottle. **Note:** Using the provided utensil (tweezer, spoon, etc.), release any air bubbles trapped underneath.
- Set it in direct sunlight or UV light (365nm) on a tray for at least 5 minutes or until hard.
- Then, fill the rest of the bottle carefully.
- Before setting, tap the bottle a few times to release the trapped air bubbles.
- Set it in direct sunlight or UV light (365nm) on a tray for at least 5 minutes or until hardened.
- Let the potion cool down before closing with the stopper.

SKU: 531166

0724-0-E

**EN** Ages 8+

Conforms to ASTM D-4236

Read and follow instructions and safety guidelines before use.

**WARNING!**  
Candles are not real.  
Do not light with any source of fire!

- NOT SUITABLE FOR CHILDREN UNDER 8 YEARS.
- ADULT SUPERVISION REQUIRED.
- KEEP YOUNGER CHILDREN UNDER THE SPECIFIED AGE LIMIT AND ANIMALS AWAY FROM THE ACTIVITY AREA.
- Caution: Very Warm – Resin under UV exposure.
- Avoid skin contact. Wash hands thoroughly with soap and water after use.
- Avoid touching resin or glue with fingers before it is completely dry. Always use the supplied tools.
- Avoid playing with resin or glue with broken skin.
- Keep contents away from eyes.
- If irritation occurs, discontinue use.
- Use in a well-ventilated area.
- Avoid direct inhalation.

**IMPORTANT INFORMATION**

Please keep this manual for reference as it contains important information.

- Do not use any items or accessories which have not been supplied with the set or recommended in the instructions for use with this kit.
- In case of injury, always seek medical advice.
- If swallowed: Wash out mouth and

drink fresh water. Do not induce vomiting. Seek immediate medical advice.

- Do not mix with real ingredients.
- Do not eat, drink or smoke in the activity area.
- Children's abilities vary, even within age groups. Supervising adults should use these instructions and exercise discretion as to which activities are suitable and safe for them.
- Components make 1 potion.

**BEFORE YOU START!**

- Contents, including specifications and colors, may vary from photos depicted.
- Cover the play area to prevent resin and glue damage to surfaces.
- An adult must be present when playing with resin and glue.
- Keep rubbing alcohol or wipes close by to clean up messes and your hands. Rubbing alcohol or wipes not included.
- It is highly recommended to wear gloves and eye protection while using resin and glue. Gloves and eye protection not included.
- It is recommended to set resin in direct sunlight. A 365nm UV light (not supplied) may be used. (Note: The intensity of the sun may vary depending on your location and time of day.)

**AFTER YOU'RE DONE...**

- Clean all surfaces and equipment after use.
- Store the product in a safe place and keep away from young children after play.
- Set any excess resin in cauldron: Leave bottle open and place in direct sunlight for at least 5 minutes to set. Do not pour in drain.

**ASSEMBLY TIPS**

**HOW TO USE GLUE!**

- Peel the seal from the bucket before use. Close the bucket of glue when not in use to prevent from drying out quickly.
- Use glue sparingly; a little will go a long way.
- Wipe off any excess glue with an alcohol wipe (not included).

**A. FLOOR**

- Before assembly, insert the 2 floor stoppers on the sides of the floorboard to prevent the tiles from moving around and to prevent glue from getting into the spaces. Remove once tiles are dry.
- Spread a small amount of glue on each floorboard space.
- Glue the tiles with the number side down.
- Place the tiles down in numerical order and push each tile closely against the previous one so the glue fills any spaces in-between.

**B. WALLS**

Gluing Arches to Walls:

- Ensure you are gluing on the blank side of the wall and not on the emblem side (back) of the wall.
- Apply glue to the 5 designated areas on the back of the arches. Align and insert the pegs on the back of the arches into the wall.

Gluing Stones to Arches:

- Sort the stones found in the crate and one of the arches to match the inscription on the borders; follow along with the image on the instruction sheet.
- Glue the stones with the number side down.

**C. FURNITURE**

- Before inserting the walls into the floor or adding any furniture on top of the floor, ensure all glued components are all completely dry.

**D. POTION TIPS**

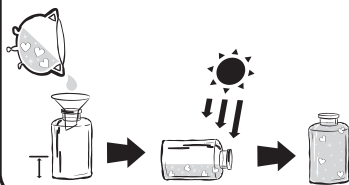

**POWDER PEARLS**

- For more color or shimmering effect crush more pearls or add more powder into your potion.
- Note:** The more powder you add to your potion the longer you will need to set it in direct sunlight or UV light (365nm).

**INGREDIENT PLACEMENT**

- To show the ingredients floating in the potion fill the bottle with a little bit of resin and lay it flat on its side and set.
- After it has set, stand upright and follow the step-by-step recipe card from your pack.

**CLOSING THE BOTTLES**

- Do not fill your potion bottle to the top.
- Follow the recipe card for instruction on where to fill up to.
- Note:** If too much resin is poured the stopper will not close properly.

**PRO TIPS**

- Warm up the resin by rubbing the bottle in-between your palms for a minute or more to make it easily pourable.
- Follow the step-by-step recipe to create either a pink or green potion.
  - You can use any extra ingredients to fill the second potion bottle.

**Resin still sticky after 5 minutes?**

Give it a little more time under direct sunlight or UV light (365nm)... the more light it gets, the better it will set.
